

PierPass

Definition:

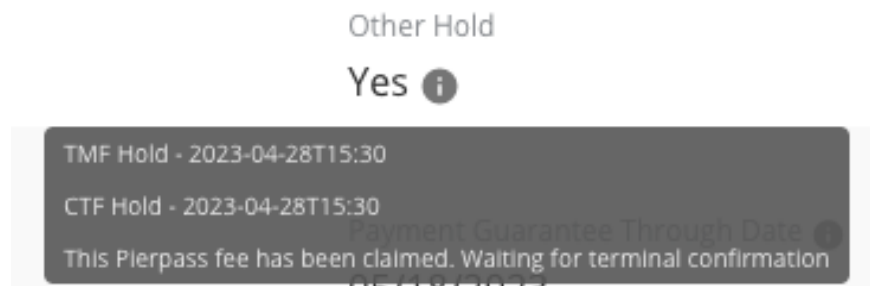

PierPASS Inc. is a not-for-profit company created by the West Coast MTO Agreement (WCMTOA) member container terminal operators at the Port of Los Angeles and Port of Long Beach to address multi-terminal issues such as congestion, air quality and security.

Link to PierPass: <https://www.pierpass.org/>

Fees:

- **CTF:** Clean Truck Fund
- **TMF:** Traffic Mitigation Fee

These two fees will create a hold on the container and when the orchestration is initiated, Envio360 will communicate to PierPass to take responsibility for the CTF/TMF charges. This is called **Claim**. This can be seen when selecting the container you want to verify and hovering over **Other Hold**.

If the terminal releases the hold and reports back to eModal, you may see the other holds removed. However, please note not all terminals report the CTF/TMF releases, so if we show the PierPass fee has been claimed, the hold should be released and then you can double-check the terminal website.

Once the container gates out, then the fees will be calculated and can be seen on the Envio360 app. Please keep in mind that the fees might not be displayed until the next business day after the container **gated out**.
