

## Security Group Setup

You can access our platform through <https://premium.emodal.com/> which takes you to the following page:

1. Click the Log In on the top right of the page and log in with the admin account (for the company) credentials.

2. From the Hamburger menu, click on Security Group Management option

## Step 2: Security Group Creation

### 3. Click on the ADD option

Administration | Security Group Management

Security groups determine which pages and functionality users can access.

Envio360 SCAC Orchestration

SECURITY GROUPS [ADD](#) [REMOVE](#)

Select Security Group [Edit](#) [Add Users](#)

4. Set the group's name and the authorization level for the group. **Temporarily, define the group with minimal capabilities as shown below. You'll be able to add the rest of the privileges for the operations group prior to go-live.**
